

## Under Vehicle Inspection Mirrors UVSM-5

The Under Vehicle Inspection Mirror is a portable inspection mirror that is used to inspect the top or bottom of vehicle or other blind corners in high security areas.

The mirror is with a hand-held system. Inspection mirrors are made of unbreakable acrylic mirror or high durable glass. Lightweight but sturdy fittings make using the inspections mirrors simple to use and the adjustable mirror head permits access to the most difficult of areas. It is used by enforcement agencies, engineering, building maintenance, armed services and security guards.

### Detailed Product Description:

1. Capability to conduct rapid and effective visual searches of vehicles
2. Stainless steel handles for transportation
3. Protection of fixed installations and other potential targets
4. Searches for contraband material
5. With 30 x 30cm convex acrylic mirror
6. With fluorescent lighting mounted on casters
7. For searching the underside of vehicles
8. Mirror offers wide field of view
9. Hinged telescopic handle can be lowered to ground level for maximum penetration
10. Illumination is provided by an energy efficient 6W fluorescent lamp
11. Powered by rechargeable Lithium battery pack
12. Supports up to six hours continuous lighting
13. Telescopic rods with T-handle can be operated more conveniently
14. Composed by one hand with fold mode
15. Foldable and easy to carry anywhere
